Combined Subject Index

A C
See Alternating current

Absolute viscosity
See Viscosity

Absorbance
See Absorption (material)

Absorbing
See Absorption (material)

Absorption (material)
Interaction Behavior of Nitrogen in Liquid Niobium. 845-853B
Determination of Hydrogen Absorption and Desorption Processes in Aluminum Melts by Continuous Hydrogen Activity Measurements. 855-860B

AC
See Alternating current

Acicular structure
Effect of Thermal Processing on the Microstructure of Ti—26Al—11Nb: Applications to Fusion Welding. 1273-1286A

Acid cleaning
See Pickling

Acid leaching
See Hydrochloric acid leaching

Acid pickling
See Pickling

Acoustic emission
Acoustic Emission During Deformation of Dual-Phase Steels. 373-379A
The Effects of Cathodic Charging on the Acoustic Emission Generated by Intergranular Cracking in Sensitized 304 Stainless Steel. 1933-1939A
Fiber and Interface Fracture in Single-Crystal Aluminum/SiC Fiber Composites. 2747-2757A

Acoustic properties
See Acoustic emission

Actinide metal alloys
See Uranium base alloys

Actinide metals
See Thorium
Uranium

Activated carbon, Sorption
^{197}Au Mössbauer Study of the Gold Species Adsorbed on Carbon From Cyanide Solutions. 239-249B

Activated charcoal
See Activated carbon

Activity (chemical)
Detailed Assessment of Partial Thermodynamic Quantities of Tin in Molten Bi—Sn Alloys From Electromotive Force Measurements. 87-96B
Application of the Quasi-Subsubregular Solution Model: the Iron—Carbon System. 447-453A
Viscosities and Activities in Lead-Smelting Slags. 501-510B
The Activity Coefficients of Oxygen in Ni—S and Co—S Melts. 529-536B
Interaction Coefficients in the Iron—Carbon—Titanium and Titanium—Silver Systems. 537-541B
Interaction Coefficients in Fe—C—Ti—i (i = Si, Cr, Al, Ni) Systems. 543-547B
Determination of the Association Constant of Sulfuric Acid. 689-695B
Determination of Hydrogen Absorption and Desorption Processes in Aluminum Melts by Continuous Hydrogen Activity Measurements. 855-860B
The Standard Gibbs Energy of Formation of CeF_3 and Its Activity Coefficient in Cryolite. 861-865B
Dimerization of Boron. 2609A
Displacement Reactions During Mechanical Alloying. 2789-2794A

Activity (chemical), Composition effects
Activity of Boron in Ni—B—C Melts Saturated With Carbon. 791-793B

Activity coefficients
See Activity (chemical)

Acurad process
See Die casting

Adhesion
The Effects of Lead on the Electrochemical and Adhesion Behavior of Zinc Electrodeposits. 81-86B

Adhesivity
See Adhesion

Adsorption
See also Chemisorption
^{197}Au Mössbauer Study of the Gold Species Adsorbed on Carbon From Cyanide Solutions. 239-249B
Effect of Oxygen on Vacancy Cluster Morphology in Metals. 1037-1051A

Aerospace
Decomposition and Dissolution Kinetics of δ' Precipitation in Al—Li Binary Alloys. 1133-1141A
Reaction Zone Microstructure in a Ti_3Al + Nb/SiC Composite. 1559-1569A
A Study of the Reaction Zone in a SiC Fiber-Reinforced Titanium Alloy Composite. 1571-1578A
Thermal Fatigue of Ti—24Al—11Nb/SCS-6. 1595-1602A
Transmission Electron Microscopy Investigation of Interfaces in a Two-Phase TiAl Alloy. 1655-1662A
Some Observations on the High-Temperature Creep Behavior of 6061 Al—SiC Composites. 2089-2090A

Age hardening
See Aging
Aging (artificial)
Aging (natural)
Precipitation hardening

Age hardening steels
See Precipitation hardening steels

Ageing
See Aging

Agents
See Catalysts

Aging
See also Aging (artificial)
Aging (natural)
Mössbauer Study of the Distribution of Carbon Interstitials in Iron Alloys and the Isochronal Kinetics of the Aging of Martensite: the Clustering—Ordering Synergy. 589-602A
Composition Dependence of Aging Kinetics in Some Cu—Zn—Al Shape Memory Alloys. 1681-1688A
Discussion of "Spinodal Decomposition During Aging of Fe—Ni—C Martensites" and Structure of the Fe_6C Carbide. 2083-2086A

Aging (artificial)
The Effect of Tempering and Aging on a Low Activation Martensitic Steel. 1853-1861A
Kinetics of Retrogression in Al—Zn—Mg—(Cu) Alloys. 2277-2280A

Aging (natural)
Lattice Changes of Iron—Nitrogen Martensite on Aging at Room Temperature. 2857-2867A

Agitation
See also Bubbling
Fluid Flow in Pachuca (Air-Agitated) Tanks. II. Mathematical Modeling of Flow in Pachuca Tanks. 191-203B

Air cooling
Effect of Cooling Rate on Hardness of FeAl and NiAl. 2281-2282A

Aircomatic welding
See Gas metal arc welding

Airfoils, Coating
The Chemical and Mechanical Processes of Thermal Fatigue Degradation of an Aluminide Coating. 1209-1222A

Airfoils, Heat treatment
Microstructure, Creep Properties, and Rejuvenation of Service-Exposed Alloy 713C Turbine Blades. 3115-3125A

Alfven waves
See Magnetohydrodynamics

Alkali metals
See Lithium
Potassium

Alkaline earth metal alloys
See Magnesium base alloys

Alkaline earth metal compounds
See Beryllium compounds

Alkaline earth metals
See Barium
Calcium
Magnesium

Alloy cast iron
See Nickel iron

Alloy plating
The Chemical and Mechanical Processes of Thermal Fatigue Degradation of an Aluminide Coating. 1209-1222A
Diffusion of Sputtered Inconel 617 Coatings in Titanium. 1613-1625A

Alloy steels
See also Chromium steels
High alloy steels
High strength steels
Molybdenum steels
Nickel steels
Precipitation hardening steels
Titanium steels
Tungsten steels

Alloy steels, Phase transformations
An Investigation of the Generality of Incomplete Transformation to Bainite in Fe—C—X Alloys. 1479-1491A

Alloy steels, Refining
Thermodynamics of Nitrogen in Ca—CaF_2 Slags. 205-207B

Alloying
See also Mechanical alloying
Standard Gibbs Energies of Formation of the Carbides of Vanadium by EMF Measurements. 313-320B

Alloys
See Bearing alloys
Brazing alloys
Casting alloys

Dispersion hardening alloys
Heat resistant alloys
Magnetic alloys
Precipitation hardening alloys
Shape memory alloys
Transition metal alloys

Alpha annealing
See Annealing

Alphatizing
See Annealing

Alternating current
Electromagnetic Stirring With Alternating Current During Electroslag Remelting. 723-731B

Alumina
See Aluminum oxide

Aluminium
See Aluminum

Aluminum, Alloying elements
Structure of Continuously Cooled Low-Carbon Vanadium Steels. 2839-2855A

Aluminum, Binary systems
Phase Relationships in the Al—Ta System. 539-545A
The Structure of the High-Temperature Phase MnAl(h) and the Displacive Transformation From MnAl(h) Into Mn_5Al_8. 1669-1672A

Aluminum, Casting
On the Heat Transfer to the Wheel in Planar-Flow Melt Spinning. 279-283B

Aluminum, Composite materials
The Infiltration of Aluminum Into Silicon Carbide Compacts. 475-485B
The Effect of Carbon on Wetting of Aluminum Oxide by Aluminum. 1745-1751A
Infiltration of Fibrous Preforms by a Pure Metal. III. Capillary Phenomena. 2257-2263A
Corrigenda and Comments on the Infiltration of Fiber Preforms. 2287A
Fiber and Interface Fracture in Single-Crystal Aluminum/SiC Fiber Composites. 2747-2757A

Aluminum, Environment
Corrosion of Mo, Nb, Cr and Y in Molten Aluminum. 2919-2928A

Aluminum, Extraction
Measurements of Magnetic Fields and Electromagnetically Driven Melt Flow in a Physical Model of a Hall—Héroult Cell. 59-69B
Thermodynamics of the System NaF—AlF_3. VI. Revision. 285-294B
A Thermodynamic Study of the Carbothermic Reduction of Alumina in Plasma. 406-408B
Mathematical Models of Current Losses in Bipolar Cells. 783-790B
The Standard Gibbs Energy of Formation of CeF_3 and Its Activity Coefficient in Cryolite. 861-865B

Aluminum, Forming
Experimental Assessment of Structure and Property Predictions During Hot Working. 3101-3114A

Aluminum, Mechanical properties
Estimation of the Yield Strength of Metals From Crystal Defect Energies. 1719-1723A
Intergranular Fracture by Slip/Grain Boundary Interaction. 2431-2436A

Aluminum, Melting
Optimal Control of an Aluminum Casting Furnace. I. The Control Model. 487-494B
Optimal Control of an Aluminum Casting Furnace. II. Fuel Optimization. 495-500B

Aluminum, Microstructure
Development of Orientation Coherence in Plane-Strain Deformation. 2223-2236A
Characterization of the Morphological and Lattice Orientational Microstructure of As-Cast Aluminum Ingot. 2265-2275A
Dislocation Structures Ahead of Advancing Cracks. 2411-2417A
An In Situ Transmission Electron Microscope Deformation Study of the Slip Transfer Mechanisms in Metals. 2437-2447A

Aluminum, Powder technology
The Physics of Mechanical Alloying: a First Report. 289-303A

Aluminum, Refining
The Breakup of Bubbles Into Jets During Submerged Gas Injection. 997-1003B

Aluminum, Solubility
Discussion of "Comments on the Solubility of Carbon in Molten Aluminum". 255-257A

Aluminum, Sorption
Determination of Hydrogen Absorption and Desorption Processes in Aluminum Melts by Continuous Hydrogen Activity Measurements. 855-860B

Aluminum, Structural hardening
Large-Strain Bauschinger Effects in FCC Metals and Alloys. 3201-3213A

Aluminum, Ternary systems
Discussion of "On the Free Energy of Formation of TiC and Al_4C_3". 2609-2610A

Aluminum, Welding
Fluid Dynamics of a Stationary Weld Pool. 45-57A

Aluminum base alloys, Alloy development
Development of an Aluminum Sheet Alloy With Improved Formability. 165-175A

Aluminum base alloys, Casting
Solidification and Microstructure Analysis of Rapidly Solidified Melt-Spun Al—Fe Alloys. 205-212A
Correction to "Solidification and Microstructure Analysis of Rapidly Solidified Melt-Spun Al—Fe Alloys". 205-212A
Mathematical Modeling of Microsegregation in Binary Metallic Alloys. 357-375B
Stability of Microstructures in Chill-Cast Aluminum Alloys Containing Twinned Columnar Growth Structures. 557-565A
Modeling of Feeding Behavior of Solidifying Al—7Si—0.3Mg Alloy Plate Casting. 715-722B
Solidification in the System Al—Ge—Si: the Phase Diagram, Coring Patterns, Eutectic Growth, and Modification. 733-740A
Heat Transfer-Solidification Kinetics Modeling of Solidification of Castings. 997-1005A
ALSPEN—a Mathematical Model for Thermal Stresses in Direct Chill Casting of Aluminum Billets. 1049-1061B
A Mathematical Model for Metal Flow and Heat Transfer in Centrifuge Melt Spinning. 1063-1073B

Aluminum base alloys, Composite materials
The Influence of Buoyant Forces and Volume Fraction of Particles on the Particle Pushing/Entrapment Transition During Directional Solidification of Al/SiC and Al/Graphite Composites. 231-239A
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. I. Effects of Matrix Precipitates. 401-410A
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. II. Finite-Element Analysis. 411-420A
The Infiltration of Aluminum Into Silicon Carbide Compacts. 475-485B
Plastic Relaxation of Thermoelastic Stress in Aluminum/Ceramic Composites. 673-682A
A General Method for Estimation of Fracture Surface Roughness. II. Practical Considerations. 1201-1207A
Crack Path Morphology in Silicon Carbide Whisker-Reinforced Aluminum Composite. 1783-1785A
Infiltration of Fiber Preforms by a Binary Alloy. I. Theory. 2059-2072A
Energetics of Particle Transfer From Gas to Liquid During Solidification Processing of Composites. 2073-2082A
Some Observations on the High-Temperature Creep Behavior of 6061 Al—SiC Composites. 2089-2090A
Microscopic Examination of the Interface Region in 6061-Al/SiC Composites Reinforced With As-Received and Oxidized SiC Particles. 2489-2496A

Aluminum base alloys, Corrosion
Role of Heat Treatment and Cathodic Charging Conditions on the Hydrogen Embrittlement of HP 7075 Aluminum Alloy. 455-464A

Aluminum base alloys, Crystal lattices
Lattice Imperfections Studied by X-Ray Diffraction in Deformed Aluminum-Base Alloys: Al—Ge Alloy. 2597-2598A

Aluminum base alloys, Diffusion
Hydrogen Diffusion in Al—Li Alloys. 649-655B

Aluminum base alloys, Forming
Calculations of Forming Limit Diagrams. 87-94A

Aluminum base alloys, Heat treatment
Lithium Diffusion in Aluminum—Lithium Alloy 2090 Clad With 7072. 39-43A
Dissolution and Melting of Secondary Al_2Cu Phase Particles in an AlCu Alloy. 1689-1695A
Kinetics of Retrogression in Al—Zn—Mg—(Cu) Alloys. 2277-2280A

Aluminum base alloys, Mechanical properties
Crack-Tip Behaviors of Stationary and Growing Cracks in Al—Fe—X Alloys. I. Near-Tip Strain Field. 69-80A
Crack-Tip Behaviors of Stationary and Growing Cracks in Al—Fe—X Alloys. II. Crack Opening Profile. 81-86A
Mechanical Properties and Microstructures of Al—Mg—Sc Alloys. 421-430A
Fatigue Crack Propagation in a Rapidly Solidified Al—12.4Fe—1.2V—2.3Si Alloy. 499-500A
Finite Element Prediction of High Cycle Fatigue Life of Aluminum Alloys. 1151-1159A
Effect of Cerium Content on the Deformation Behavior of Rapidly Solidified Al—Fe—Ce Alloys. 2155-2158A
The Nature of the Two Opening Levels Following an Overload in Fatigue Crack Growth. 2717-2727A
New Aspects on the Superplasticity of Fine-Grained 7475 Aluminum Alloys. 2729-2737A

Aluminum base alloys, Metal working
Annealing Response of 3000 and 5000 Series Aluminum Alloys. 2643-2654A

Aluminum base alloys, Microstructure
The Evolution of Microstructure in Al—2Cu Thin Films: Precipitation, Dissolution, and Reprecipitation. 2449-2458A
Phase Formation in Electrodeposited and Thermally Annealed Al—Mn Alloys. 2869-2879A

Aluminum base alloys, Nondestructive testing
The Acoustoelastic Response of a Textured Material During Elastic—Plastic Deformation. 3011-3019A

Aluminum base alloys, Powder technology
Extended Al(Mn) Solution in a Rapidly Solidified Al—Li—Mn—Zr Alloy. 1785-1789A

Aluminum base alloys, Structural hardening
Decomposition and Dissolution Kinetics of δ' Precipitation in Al—Li Binary Alloys. 1133-1141A
Large-Strain Bauschinger Effects in FCC Metals and Alloys. 3201-3213A

Aluminum base alloys, Welding
Effects of Heat-Affected Zone Peak Temperatures on the Microstructure and Properties of 2090 Aluminum Alloy. 2795-2804A

Aluminum bronzes, Forming
An Experimental Investigation of the Superplastic Forming Behavior of a Commercial Aluminum-Bronze. 2957-2966A

Aluminum compounds
See also Aluminum oxide

Temperature and Orientation Dependence of the Deformation and Fracture in Boron-Doped $Ni_{76}Al_{19}Ti_5$ Single Crystals. 107-115A

Aluminum compounds, Atomic properties
Transmission Electron Microscopy Investigation of Interfaces in a Two-Phase TiAl Alloy. 1655-1662A

Aluminum compounds, Composite materials
Interaction of Al_2O_3—ZrO_2 Fibers With a Ti—Al Matrix During Pressure Casting. 213-219A
Identification of Thermodynamically Stable Ceramic Reinforcement Materials for Iron Aluminide Matrices. 441-446A
Reaction Zone Microstructure in a Ti_3Al + Nb/SiC Composite. 1559-1569A
Matrix/Reinforcement Interactions in Shock-Wave Consolidated Titanium Aluminide Reinforced With SiC. 1589-1593A
Thermal Fatigue of Ti—24Al—11Nb/SCS-6. 1595-1602A
High-Temperature Slow-Strain-Rate Compression Studies on CoAl—TiB_2 Composites. 2179-2188A
Determination of Residual Stresses in Thin Sheet Titanium Aluminide Composites. 2701-2707A
Microstructure of a Pressure-Cast Fe_3Al Intermetallic Alloy Composite Reinforced With Zirconia-Toughened Alumina Fibers. 2881-2889A

Aluminum compounds, Crystal lattices
Preferred Orientations in Extruded Nickel and Iron Aluminides. 279-288A

Aluminum compounds, Diffusion
On the Chemistry of Grain Boundary Segregation and Grain Boundary Fracture. 2339-2354A

Aluminum compounds, Irradiation
Amorphization in Zr_3Al Irradiated With 1 MeV e^- and Kr^+. 1799-1808A

Aluminum compounds, Mechanical properties
The Flow and Fracture of a Ti_3Al—Nb Alloy. 135-143A
Microstructure, Deformation, and Fracture Characteristics of an $Al_{67}Pd_8Ti_{25}$ Intermetallic Alloy. 145-151A
Effect of Cooling Rate on Hardness of FeAl and NiAl. 2281-2282A
Intergranular Fracture by Slip/Grain Boundary Interaction. 2431-2436A
Elastic Strain Energy of Deformation Twinning in Tetragonal Crystals. 2521-2530A
Fracture and Toughening Mechanisms in an α_2 Titanium Aluminide Alloy. 2687-2699A
Mechanical Properties of Diverse Binary High-Temperature Intermetallic Compounds. 2709-2715A
Effects of Temperature and Environment on the Tensile and Fatigue Crack Growth Behavior of a Ni_3Al-Base Alloy. 2967-2976A
Tensile and Impact Properties of Directionally Solidified Fe—40Al Intermetallic. 3027-3028A
Mechanical Properties of Alloys of IrNb and Other High-Temperature Intermetallic Compounds. 3063-3074A

Aluminum compounds, Microstructure
Microscopy and Tensile Behavior of Melt-Spun Ni—Al—Fe Alloys. 959-970A

Aluminum compounds, Powder technology
The Combustion Synthesis of Copper Aluminides. 567-577B

Aluminum compounds, Welding
Effect of Thermal Processing on the Microstructure of Ti—26Al—11Nb: Applications to Fusion Welding. 1273-1286A

Aluminum killed steels, Forming
Calculations of Forming Limit Diagrams. 87-94A

Aluminum killed steels, Metal working
Acoustoelastic Determination of the Higher Order Orientation Distribution Function Coefficients Up to l = 12 and Their Use for the On-Line Prediction of r-Value. 697-706A

Aluminum killed steels, Rolling
Measurement and Prediction of Plastic Anisotropy in Deep-Drawing Steels. 331-343A

Aluminum oxide
See also Sapphire

Aluminum oxide, Composite materials
Interaction of Al_2O_3—ZrO_2 Fibers With a Ti—Al Matrix During Pressure Casting. 213-219A
A General Method for Estimation of Fracture Surface Roughness. II. Practical Considerations. 1201-1207A
Infiltration of Fiber Preforms by a Binary Alloy. I. Theory. 2059-2072A
Infiltration of Fibrous Preforms by a Pure Metal. III. Capillary Phenomena. 2257-2263A
High-Temperature Interactions of Refractory Metal Matrices With Selected Ceramic Reinforcements. 2829-2837A
Microstructure of a Pressure-Cast Fe_3Al Intermetallic Alloy Composite Reinforced With Zirconia-Toughened Alumina Fibers. 2881-2889A

Aluminum oxide, Mechanical properties
The Fracture Energy of Bimaterial Interfaces. 2419-2429A

Amorphous structure, Heating effects
Phase Formation in Electrodeposited and Thermally Annealed Al—Mn Alloys. 2869-2879A

Amorphous structure, Radiation effects
Amorphization in Zr_3Al Irradiated With 1 MeV e^- and Kr^+. 1799-1808A
Irradiation as a Tool for Studying Solid-State Amorphization Phenomena. 1809-1815A

Mechanical Properties of Ti—Cr—Nb Alloys and Prospects for High-Temperature Applications. 2149-2154A

Oxide cathodes
See Cathodes

Oxides
See also Aluminum oxide
Lime

Oxides, Alloying additive
Effect of Rare Earth Metal Oxide Additions to Tungsten Electrodes. 3221-3236A

Oxides, Composite materials
Identification of Thermodynamically Stable Ceramic Reinforcement Materials for Iron Aluminide Matrices. 441-446A

Oxides, Microstructure
Low-Energy Interfaces in NiO—ZrO_2(CaO) Eutectic. 2309-2315A

Oxides, Phases (state of matter)
Phase Diagram of Cu_2O—CuO—Y_2O_3 System in Air. 2243-2248A

Oxidizing
See Oxidation

Oxygen, Dopants
The Effect of Oxygen on Void Stability in Ion-Irradiated Steel. 1839-1846A

Oxygen, Impurities
The Influence of Oxygen on the Structure, Fracture, and Fatigue Crack Propagation Behavior of Ti—8.6 wt.% Al. 95-105A

Oxygen, Reactions (chemical)
Equilibria Between Cerium or Neodymium and Oxygen in Molten Iron. 295-302B

Oxygen, Sorption
Effect of Oxygen on Vacancy Cluster Morphology in Metals. 1037-1051A

Oxygen, Ternary systems
An Assessment of the Ca—Fe—O System. 2759-2776A

Oxygen compounds
See Oxides
Silicates

Oxygen conversion processes
See Oxygen steel making

Oxygen steel making
Theoretical Interpretation of the Decarburization Mechanism in Convective Oxygen Steelmaking. 49-57B

Packing (amorphous structure)
See Amorphous structure

Packing (crystal density)
See Crystal structure

Packing (liquid structure)
See Atomic structure

Palladium, Alloying elements
Microstructure, Deformation, and Fracture Characteristics of an $Al_{67}Pd_8Ti_{25}$ Intermetallic Alloy. 145-151A

Palladium, Corrosion
The Use of Silver Decoration Technique in the Study of Hydrogen Transport in Metallic Materials. 603-608A

Parameters
See Lattice parameters
Welding parameters

Particle size
Plastic Relaxation of Thermoelastic Stress in Aluminum/Ceramic Composites. 673-682A
Modeling of Spray Deposition: Measurements of Particle Size, Gas Velocity, Particle Velocity, and Spray Temperature in Gas-Atomized Sprays. 899-912B

Particulate composites
Plastic Relaxation of Thermoelastic Stress in Aluminum/Ceramic Composites. 673-682A

Particulate composites, Casting
Energetics of Particle Transfer From Gas to Liquid During Solidification Processing of Composites. 2073-2082A
Microscopic Examination of the Interface Region in 6061-Al/SiC Composites Reinforced With As-Received and Oxidized SiC Particles. 2489-2496A

Particulate composites, Directional solidification
The Influence of Buoyant Forces and Volume Fraction of Particles on the Particle Pushing/Entrapment Transition During Directional Solidification of Al/SiC and Al/Graphite Composites. 231-239A

Particulate composites, Mechanical properties
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. I. Effects of Matrix Precipitates. 401-410A
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. II. Finite-Element Analysis. 411-420A
The Effect of Matrix Reinforcement Reaction on Fracture in Ti—6Al—4V-Base Composites. 1579-1587A
High-Temperature Slow-Strain-Rate Compression Studies on CoAl—TiB_2 Composites. 2179-2188A

Particulate composites, Powder technology
Matrix/Reinforcement Interactions in Shock-Wave Consolidated Titanium Aluminide Reinforced With SiC. 1589-1593A

Pearlite
Effect of Pearlite Morphology on Hydrogen Permeation, Diffusion, and Solubility in Carbon Steels. 3257-3258A

Penrose tiling
See Quasicrystalline structure

Permalloy
See Ferrous alloys
Magnetic alloys
Nickel base alloys
Permanent magnets

Permanent magnets, Irradiation
Sm—Co Permanent Magnets: Effects of Fast Neutron Irradiation. 1817-1821A

Permanent mold casting
See Die casting

Permeability
In Situ Measurement of Effective Gas Diffusivity Through Hematite Pellets During Stepwise Reductions. 677-687B

Phase boundary
Interphase Boundary Structures Associated With Diffusional Phase Transformations in Titanium-Base Alloys. 1627-1643A
Microstructure of a Pressure-Cast Fe_3Al Intermetallic Alloy Composite Reinforced With Zirconia-Toughened Alumina Fibers. 2881-2889A

Phase boundary, Radiation effects
Radiation as a Tool in Understanding Phase Transformations. 1073-1082A
Fuel Constituent Redistribution During the Early Stages of U—Pu—Zr Irradiation. 1871-1876A

Phase decomposition

Microstructure, Creep Properties, and Rejuvenation of Service-Exposed Alloy 713C Turbine Blades. 3115-3125A

Superalloys, Mechanical properties
High-Temperature Deformation Mechanisms and Constitutive Equations for the Oxide Dispersion-Strengthened Superalloy MA 956. 353-364A
Influence of Molybdenum on the Creep Properties of Nickel-Base Superalloy Single Crystals. 381-388A
Influence of Test Parameters on the Thermal—Mechanical Fatigue Behavior of a Superalloy. 389-399A
Influence of Microstructure on the Thermal Fatigue Behavior of a Cast Cobalt-Base Superalloy. 949-958A
Fatigue Crack Propagation Behavior of a Single Crystalline Superalloy. 2169-2177A
Intrinsic Stage I Crack Growth of Directionally Solidified Nickel-Base Superalloys During Low-Cycle Fatigue at Elevated Temperature. 2201-2208A
Inhomogeneous Deformation in Inconel 718 During Monotonic and Cyclic Loadings. 3215-3220A

Superalloys, Melting
Electromagnetic Stirring With Alternating Current During Electroslag Remelting. 723-731B
Influence of Gravity on the Dispersoids During the Melting of an Oxide Dispersion-Strengthened Alloy (Inconel MA754). 753-755A

Superalloys, Welding
A Comparison of the Solidification Behavior of Incoloy 909 and Inconel 718. 479-488A

Superconductors, Composite materials
High T_c Composite Silver/Oxide Superconductors. 257-260A

Superconductors, Irradiation
Radiation Effects in High-Temperature Superconductors: a Brief Review. 1015-1019A

Superconductors, Phases (state of matter)
Phase Diagram of Cu_2O—CuO—Y_2O_3 System in Air. 2243-2248A

Supercooling
Solidification and Microstructure Analysis of Rapidly Solidified Melt-Spun Al—Fe Alloys. 205-212A
Correction to "Solidification and Microstructure Analysis of Rapidly Solidified Melt-Spun Al—Fe Alloys". 205-212A
Modeling of Microsegregation Under Rapid Solidification Conditions. 260-263A
Spangle Formation in Galvanized Sheet Steel Coatings. 549-558B

Superplastic forming
An Experimental Investigation of the Superplastic Forming Behavior of a Commercial Aluminum-Bronze. 2957-2966A

Superplasticity
Mechanical Properties and Microstructures of Al—Mg—Sc Alloys. 421-430A
Interface Sliding, Migration, and Cracking During Fatigue Deformation of a Superplastic Aluminum—Zinc Eutectoid Alloy. 2497-2504A
The Effect of Fatigue Deformation on Microstructural Evolution in a Superplastic Aluminum—Zinc Eutectoid Alloy. 2505-2511A

Superplasticity, Impurity effects
Effect of Impurity Content on Cavitation in the Superplastic Zn—22Al Alloy. 2605-2608A

Superplasticity, Microstructural effects
New Aspects on the Superplasticity of Fine-Grained 7475 Aluminum Alloys. 2729-2737A

Surface analysis (chemical)
Deuterium Surface Segregation in Titanium Alloys. 2003-2007A

Surface diffusion
See Diffusion

Surface energy
Spangle Formation in Galvanized Sheet Steel Coatings. 549-558B
Atomic Structure and Energy of $\Sigma = 5$ Tilt Boundaries in Gold. 2299-2307A

Surface finishing
See Surface pretreatments

Surface hardening
Studies of Carbides in a Rapidly Solidified High-Speed Steel. 3021-3026A

Surface layer, Heating effects
Phase Transformations and Stress Relaxation in γ'-Fe_4N_{1-x} Surface Layers During Oxidation. 901-912A

Surface layer, X ray analysis
Development and Relaxation of Stress in Surface Layers; Composition and Residual Stress Profiles in γ'-Fe_4N_{1-x} Layers on α-Iron Substrates. 189-204A

Surface pretreatments
Lithium Diffusion in Aluminum—Lithium Alloy 2090 Clad With 7072. 39-43A
The Effect of Carbon on Wetting of Aluminum Oxide by Aluminum. 1745-1751A
Microscopic Examination of the Interface Region in 6061-Al/SiC Composites Reinforced With As-Received and Oxidized SiC Particles. 2489-2496A

Surface structure, Corrosion effects
Phase Transitions in Rapidly Solidified Stainless Steels Cathodically Hydrogen Charged. 1251-1259A

Surface structure, Heating effects
Studies of Carbides in a Rapidly Solidified High-Speed Steel. 3021-3026A

Surface tension
Spangle Formation in Galvanized Sheet Steel Coatings. 549-558B
Effect of Oxygen on Vacancy Cluster Morphology in Metals. 1037-1051A
Energetics of Particle Transfer From Gas to Liquid During Solidification Processing of Composites. 2073-2082A

Suspensions
See Dispersions

Swelling, Radiation effects
Swelling Behavior of U—Pu—Zr Fuel. 517-528A
Unified Theoretical Analysis of Experimental Swelling Data for Irradiated Austenitic and Ferritic/Martensitic Alloys. 1021-1035A
Contributions From Research on Irradiated Ferritic/Martensitic Steels to Materials Science and Engineering. 1065-1071A
Modeling Dislocation Evolution in Irradiated Alloys. 1829-1837A
Experimental Studies of U—Pu—Zr Fast Reactor Fuel Pins in the Experimental Breeder Reactor-II. 1863-1870A
Fuel Constituent Redistribution During the Early Stages of U—Pu—Zr Irradiation. 1871-1876A

Synthesis
The Combustion Synthesis of Copper Aluminides. 567-577B
Modeling of Materials Synthesis in Hybrid Plasma Reactors: Production of Silicon by Thermal Decomposition of $SiCl_4$. 589-598B

Systems (metallurgical)
See Binary systems
Ternary systems

Tantalum, Binary systems
Phase Relationships in the Al—Ta System. 539-545A

Tantalum, Composite materials
High-Temperature Interactions of Refractory Metal Matrices With Selected Ceramic Reinforcements. 2829-2837A

Tantalum, Corrosion
Embrittlement by Liquid Uranium in Some Group VB and VIB Metals and Alloys During Tensile Loading at 1473K. 1959-1967A

Tantalum, Extraction
Distribution of Niobium or Tantalum Between Fluorine-Containing Slag and Iron in Blast Furnace Smelting. 873-878B

Tantalum base alloys, Corrosion
Embrittlement by Liquid Uranium in Some Group VB and VIB Metals and Alloys During Tensile Loading at 1473K. 1959-1967A

Temperature
See Temperature distribution
Temperature gradient

Temperature control
Optimal Control of an Aluminum Casting Furnace. I. The Control Model. 487-494B
Optimal Control of an Aluminum Casting Furnace. II. Fuel Optimization. 495-500B

Temperature distribution
Hydrogen Permeation in Stationary Arc-Melted Nickel 200. 579-587B

Temperature field
See Temperature distribution

Temperature gradient
Modeling of Collision and Coalescence of Droplets During Microgravity Processing of Zn—Bi Immiscible Alloys. 59-68A
Dendritic Solidification of Magnesium Alloy AZ91. 221-230A
Dendrite Arm Climb by Temperature Gradient Zone Melting During Solidification of a High-Speed Tool Steel. 264-266A
Atomic Mass Transport of Carbon in Two-Phase Nb—1.0Zr—0.1C Alloy Under a Temperature Gradient. 2929-2934A

Temperature measurement
See Pyrometry

Tempering

Tensile strength
Yield strength
Fracture Behavior of C—Mn Steel and Weld Metal in Notched and Precracked Specimens. I. Fracture Behavior. 313-320A
Mechanical Properties and Microstructures of Al—Mg—Sc Alloys. 421-430A
Structure, Tensile Deformation, and Fracture of a Ti_3Al—Nb Alloy. 609-625A
Creep Behavior of Ti—25Al—10Nb—3V—1Mo. 641-651A
Mechanical Properties of Fully Densified Injection-Molded Carbonyl Iron Powder. 2531-2538A

Tensile properties, Alloying effects
Effects on Microstructure and Tensile Properties of a Zirconium Addition to a Cu—Al—Ni Shape Memory Alloy. 741-744A
Effect of Boron on the Microstructure and Tensile Properties of Dual-Phase Steel. 2547-2553A
Fracture Toughness of Calcium-Modified Ultrahigh-Strength 4340 Steel. 2739-2746A

Tensile properties, Composition effects
Matrix Composition Effects on the Tensile Properties of Tungsten—Molybdenum Heavy Alloys. 1325-1327A

Tensile properties, Corrosion effects
Role of Heat Treatment and Cathodic Charging Conditions on the Hydrogen Embrittlement of HP 7075 Aluminum Alloy. 455-464A

Tensile properties, Deformation effects
Effect of Hot Working on Structure and Strength of Type 304L Austenitic Stainless Steel. 1969-1987A

Tensile properties, Microstructural effects
Effect of Phase Morphologies on the Mechanical Properties of Babbitt/Bronze Composite Interfaces. 529-538A

Tensile properties, Radiation effects
Review of Small Specimen Test Techniques for Irradiation Testing. 1105-1119A

Tensile properties, Temperature effects
Effects of Temperature and Environment on the Tensile and Fatigue Crack Growth Behavior of a Ni_3Al-Base Alloy. 2967-2976A

Tensile strength
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. II. Finite-Element Analysis. 411-420A
Influences of Matrix Ductility, Interfacial Bonding Strength, and Fiber Volume Fraction on Tensile Strength of Unidirectional Metal Matrix Composite. 971-977A
Finite Element Prediction of High Cycle Fatigue Life of Aluminum Alloys. 1151-1159A
The Effect of Matrix Reinforcement Reaction on Fracture in Ti—6Al—4V-Base Composites. 1579-1587A
Delayed Mechanical Failure of Silver-Interlayer Diffusion Bonds. 3085-3100A

Tensile strength, Corrosion effects
Internal Hydrogen Effects on Tensile Properties of Iron- and Nickel-Base Superalloys. 365-372A
Gas Phase Embrittlement of Nickel by Sulfur. 3049-3061A

Tensile strength, Impurity effects
The Influence of Oxygen on the Structure, Fracture, and Fatigue Crack Propagation Behavior of Ti—8.6 wt.% Al. 95-105A

Tensile strength, Microstructural effects
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. I. Effects of Matrix Precipitates. 401-410A

Tensile strength, Welding effects
Effects of Heat-Affected Zone Peak Temperatures on the Microstructure and Properties of 2090 Aluminum Alloy. 2795-2804A

Tensile tests
See Tension tests

Tensile yield strength
See Yield strength

Tension impact tests
See Impact tests

Tension tests
Through-Thickness Fracture of a Ti—V—N Plate Steel. 1177-1191A
The Effect of Microstructure on Localized Melting at Separation in Ti—6Al—4V Tensile Samples. 3127-3136A
Inhomogeneous Deformation in Inconel 718 During Monotonic and Cyclic Loadings. 3215-3220A

Terbium compounds, Directional solidification
Directional Solidification and Heat Treatment of Terfenol-D Magnetostrictive Materials. 2249-2255A

Ternary systems, Phases (state of matter)
A Reassessment of the Cr—Fe—Ni System. 1673-1680A
The Ag—Au—Si System: Experimental and Calculated Phase Diagram. 1877-1884A
A Thermodynamic Assessment of the Fe—Mn—C System. 2115-2123A
A Thermodynamic Evaluation of the Cr—Fe—N System. 2477-2488A
Discussion of "On the Free Energy of Formation of TiC and Al_4C_3". 2609-2610A

An Assessment of the Ca—Fe—O System. 2759-2776A
Thermodynamic Evaluation of the Cr—Ni—C System. 2777-2787A

Texture
See also Rolling texture
Characterization of the Morphological and Lattice Orientational Microstructure of As-Cast Aluminum Ingot. 2265-2275A
Interface Characterization of Epitaxial Silver Films on Si(100) and Si(111) Grown by Molecular Beam Epitaxy. 2323-2332A

Texture, Deformation effects
Biaxial Creep Testing of Textured Ti—3Al—2.5V Tubing. 3001-3010A

Texture, Heating effects
Annealing Response of 3000 and 5000 Series Aluminum Alloys. 2643-2654A

Thermal capacity
See Specific heat

Thermal cycling
Fatigue and Fracture of High-Alloyed Steel Specimens Subjected to Purely Thermal Cycling. 935-948A
Effects of Heat-Affected Zone Peak Temperatures on the Microstructure and Properties of 2090 Aluminum Alloy. 2795-2804A

Thermal decomposition

High T_c Composite Silver/Oxide Superconductors. 257-260A

Transition temperature (superconductivity), Radiation effects
Radiation Effects in High-Temperature Superconductors: a Brief Review. 1015-1019A

Transmission
See Heat transmission

Transmission electron microscopy
High-Temperature Transmission Electron Microscopy In Situ Study of Lower Bainite Carbide Precipitation. 853-858A

TTT curves
A Perspective on the Morphology of Bainite. 817-829A
High-Temperature Transmission Electron Microscopy In Situ Study of Lower Bainite Carbide Precipitation. 853-858A
The Bainite Transformation in Chemically Heterogeneous 300M High-Strength Steel. 859-875A
Morphology and Properties of Low-Carbon Bainite. 877-888A
Fatigue and Fracture of High-Alloyed Steel Specimens Subjected to Purely Thermal Cycling. 935-948A
Growth and Overall Transformation Kinetics Above the Bay Temperature in Fe—C—Mo Alloys. 1413-1432A
The Incomplete Transformation Phenomenon in Fe—C—Mo Alloys. 1433-1463A
Overall Reaction Kinetics and Morphology of Austenite Decomposition Between the Upper Nose and the M_s of a Hypoeutectoid Fe—C—Cr Alloy. 1465-1478A
Continuous Cooling Transformations and Microstructures in a Low-Carbon, High-Strength Low-Alloy Plate Steel. 1493-1507A
The Effect of Manganese and Silicon on the Morphology and Kinetics of the Bainite Transformation in Fe—C—Ti Alloys. 1509-1515A
The Influence of the Silicon and Manganese Concentrations on the Kinetics of the Bainite Transformation in Fe—C—Si—Mn Alloys. 1517-1525A

Tube rolling
Laboratory Simulation of Seamless Tube Piercing and Rolling Using Dynamic Recrystallization Schedules. 153-164A

Tubemaking
See Tube rolling

Tubes
See also Seamless tubes

Tubes, Mechanical properties
Biaxial Creep Testing of Textured Ti—3Al—2.5V Tubing. 3001-3010A

Tubing (metal)
See Tubes

Tubular goods
See Tubes

Tungsten, Corrosion
Embrittlement by Liquid Uranium in Some Group VB and VIB Metals and Alloys During Tensile Loading at 1473K. 1959-1967A

Tungsten, Metallography
Image Analysis for Grain Shape Characterization in Lamp Filaments. 2209-2214A

Tungsten, Powder technology
Degree of Pore-Grain Boundary Contact During Sintering. 2137-2139A
Nanocrystalline Metals Prepared by High-Energy Ball Milling. 2333-2337A

Tungsten arc welding
See Gas tungsten arc welding

Tungsten base alloys, Mechanical properties
The Composition and Temperature Dependence of the Mechanical Properties of Tungsten Alloys. 744-748A

Tungsten base alloys, Powder technology
Matrix Composition Effects on the Tensile Properties of Tungsten—Molybdenum Heavy Alloys. 1325-1327A

Tungsten inert gas welding
See Gas tungsten arc welding

Tungsten steels, Heat treatment
Tempering of Steel During Laser Treatment. 987-995A

Turbine blades, Heat treatment
Microstructure, Creep Properties, and Rejuvenation of Service-Exposed Alloy 713C Turbine Blades. 3115-3125A

Turbine disks, Heat treatment
Effects of Cooling Rate and γ' Morphology on Creep and Stress-Rupture Properties of a Powder Metallurgy Superalloy. 1709-1717A

Turbines
See also Gas turbine engines

Turbines, Materials selection
Fatigue Crack Propagation Behavior of a Single Crystalline Superalloy. 2169-2177A

Turbomachinery
See Turbines

Tuyeres
The Breakup of Bubbles Into Jets During Submerged Gas Injection. 997-1003B

Twinning
Stability of Microstructures in Chill-Cast Aluminum Alloys Containing Twinned Columnar Growth Structures. 557-565A
Transmission Electron Microscopy Investigation of Interfaces in a Two-Phase TiAl Alloy. 1655-1662A
The Effect of Deformation-Induced Transformation on the Fracture Toughness of Commercial Titanium Alloys. 1733-1744A
Twin Boundaries in C54—$TiSi_2$. 2317-2322A
Interface Characterization of Epitaxial Silver Films on Si(100) and Si(111) Grown by Molecular Beam Epitaxy. 2323-2332A
Dislocation Structures Ahead of Advancing Cracks. 2411-2417A
Elastic Strain Energy of Deformation Twinning in Tetragonal Crystals. 2521-2530A

Twinning, Heating effects
Study of Annealing Twins in FCC Metals and Alloys. 2891-2896A

Udylite process
See Electroplating

Ultimate tensile strength
See Tensile strength

Ultrasonic attenuation
Acoustoelastic Determination of the Higher Order Orientation Distribution Function Coefficients Up to l = 12 and Their Use for the On-Line Prediction of r-Value. 697-706A
Ultrasonic Velocity Change With Creep Damage in Copper. 1725-1732A

Ultrasonic testing
Ultrasonic Velocity Change With Creep Damage in Copper. 1725-1732A

Undercooling
See Supercooling

Upset forging
See Upsetting

Upsetting
Experimental Assessment of Structure and Property Predictions During Hot Working. 3101-3114A

Uranium, Environment
Embrittlement by Liquid Uranium in Some Group VB and VIB Metals and Alloys During Tensile Loading at 1473K. 1959-1967A

Uranium, Extraction
Continuous Precipitation of Uranium With Hydrogen Peroxide. 819-826B
Solubility of Uranous Sulfate in Aqueous Sulfuric Acid Solution. 839-844B

Uranium base alloys, Irradiation
Swelling Behavior of U—Pu—Zr Fuel. 517-528A
Experimental Studies of U—Pu—Zr Fast Reactor Fuel Pins in the Experimental Breeder Reactor-II. 1863-1870A
Fuel Constituent Redistribution During the Early Stages of U—Pu—Zr Irradiation. 1871-1876A

Uranium base alloys, Phase transformations
The Kinetics of the Isothermal Martensitic $\beta \rightarrow \alpha$ Transformation in U(Ga) Alloys. 2125-2129A
Application of the Double-Shear Theory of Martensite Crystallography to the $\beta \rightarrow \alpha'$ Transformation in an U(Ga) Alloy. 2131-2136A

V A characteristics
See Current voltage characteristics

V notch Charpy impact tests
See Impact tests

V notch Charpy tests
See Impact tests

Vacancies (crystal defects)
See Lattice vacancies

Vacancies (lattice)
See Lattice vacancies

Vacuum induction melting
Influence of Gravity on the Dispersoids During the Melting of an Oxide Dispersion-Strengthened Alloy (Inconel MA754). 753-755A

Vacuum melting
See Vacuum induction melting

Vanadium, Alloying elements
Laboratory Simulation of Seamless Tube Piercing and Rolling Using Dynamic Recrystallization Schedules. 153-164A
Standard Gibbs Energies of Formation of the Carbides of Vanadium by EMF Measurements. 313-320B
Structure of Continuously Cooled Low-Carbon Vanadium Steels. 2839-2855A

Vanadium, Corrosion
Embrittlement by Liquid Uranium in Some Group VB and VIB Metals and Alloys During Tensile Loading at 1473K. 1959-1967A

Vanadium, Extraction
The Dependence of the Oxidation State of Vanadium on the Oxygen Pressure in Melts of VO_x, Na_2O—VO_x, and CaO—SiO_2—VO_x. 111-120B

Vanadium compounds, Mechanical properties
Mechanical Properties of Alloys of IrNb and Other High-Temperature Intermetallic Compounds. 3063-3074A

Vapor deposition
Three-Dimensional Transport Phenomena in Chemical Vapor Deposition Equipment: a Comparison of Theoretical Predictions With Measurements and Some Concepts Regarding Equipment Design. 753-760B

Vaporizing
Fuming of Stannous Oxide From Silicate Melts. 449-454B
The Process of Bubble Formation in the Hot Isostatic Pressing Treated, Doped Molybdenum Wire. 919-923A

Veining (structure)
See Preferred orientation

Vessels
See Pressure vessels

Viscosity
Viscosities and Activities in Lead-Smelting Slags. 501-510B

Voids
A Study of Void Nucleation, Growth, and Coalescence in Spheroidized 1518 Steel. 117-134A

Hydrogen-Assisted Ductile Fracture in Spheroidized 1520 Steel. I. Axisymmetric Tension. 465-477A
A Study of the Reaction Zone in a SiC Fiber-Reinforced Titanium Alloy Composite. 1571-1578A

Voids, Radiation effects
Contributions From Research on Irradiated Ferritic/Martensitic Steels to Materials Science and Engineering. 1065-1071A
The Effect of Oxygen on Void Stability in Ion-Irradiated Steel. 1839-1846A
Effects of Preinjected Helium in Heavy-Ion Irradiated Nickel and Nickel—Copper Alloys. 1847-1851A

Volatilizing
See Vaporizing

Water
See Salt water

Water content
See Moisture content

Water quenching
Effect of Cooling Rate on Hardness of FeAl and NiAl. 2281-2282A

Wear
See also Pitting (wear)

Wear, Heating effects
Tempering of Steel During Laser Treatment. 987-995A

Wear resistance, Heating effects
Plasma Source Nitrogen Ion Implantation of Ti—6Al—4V. 1663-1667A

Weathering steels
See Structural steels

Weld defects
Effect of Oxygen on Hydrogen Cracking in High-Strength Weld Metal. 1287-1298A

Weld metal, Microstructure
Solidification Microstructures and Phase Transformations in Al—Ti—Si—Mn Deoxidized Steel Weld Metals. 2047-2058A

Welded joints
Modeling of Interfacial Phenomena in Welding. 600-603B

Welded joints, Corrosion
Hydrogen Permeation in Stationary Arc-Melted Nickel 200. 579-587B
Effect of Oxygen on Hydrogen Cracking in High-Strength Weld Metal. 1287-1298A

Welded joints, Mechanical properties
Fracture Behavior of C—Mn Steel and Weld Metal in Notched and Precracked Specimens. I. Fracture Behavior. 313-320A
Fracture Behavior of C—Mn Steel and Weld Metal in Notched and Precracked Specimens. II. Micromechanism of Fracture. 321-330A
Structure—Property Relationships in Bainitic Steels. 1527-1540A
Delayed Mechanical Failure of Silver-Interlayer Diffusion Bonds. 3085-3100A

Welded joints, Microstructure
Grain Structures in Gas Tungsten-Arc Welds of Austenitic Stainless Steels With Ferrite Primary Phase. 979-986A
Effect of Thermal Processing on the Microstructure of Ti—26Al—11Nb: Applications to Fusion Welding. 1273-1286A
Microstructure of Stainless Steel Single-Crystal Electron Beam Welds. 1753-1766A
Analysis of Solidification Microstructures in Fe—Ni—Cr Single-Crystal Welds. 1767-1782A
The Effect of Alloy Composition and Welding Conditions on Columnar-Equiaxed Transitions in Ferritic Stainless Steel Gas-Tungsten Arc Welds. 2009-2019A
Microstructure of Welded and Weld-Simulated 3Cr—1.5Mo—0.1V Ferritic Steel. 2021-2036A
Solidification Microstructures and Phase Transformations in Al—Ti—Si—Mn Deoxidized Steel Weld Metals. 2047-2058A

Welding
Fluid Dynamics of a Stationary Weld Pool. 45-57A

Welding electrodes
Effect of Rare Earth Metal Oxide Additions to Tungsten Electrodes. 3221-3236A

Welding parameters
Modeling of Interfacial Phenomena in Welding. 600-603B
Microstructure of Stainless Steel Single-Crystal Electron Beam Welds. 1753-1766A
Analysis of Solidification Microstructures in Fe—Ni—Cr Single-Crystal Welds. 1767-1782A
The Effect of Alloy Composition and Welding Conditions on Columnar-Equiaxed Transitions in Ferritic Stainless Steel Gas-Tungsten Arc Welds. 2009-2019A

Weldments, Mechanical properties
Effects of Heat-Affected Zone Peak Temperatures on the Microstructure and Properties of 2090 Aluminum Alloy. 2795-2804A

Welds
See Welded joints

Wetness
See Moisture content

Wettability
The Infiltration of Aluminum Into Silicon Carbide Compacts. 475-485B
Infiltration of Fibrous Preforms by a Pure Metal. III. Capillary Phenomena. 2257-2263A
Corrigenda and Comments on the Infiltration of Fiber Preforms. 2287A

Wettability, Alloying effects
Thermodynamics of Titanium in Ag—Cu Alloys. 349-355B

Wettability, Coating effects
The Effect of Carbon on Wetting of Aluminum Oxide by Aluminum. 1745-1751A

Wetting
Energetics of Particle Transfer From Gas to Liquid During Solidification Processing of Composites. 2073-2082A

Whisker composites, Mechanical properties
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. I. Effects of Matrix Precipitates. 401-410A
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. II. Finite-Element Analysis. 411-420A
Crack Path Morphology in Silicon Carbide Whisker-Reinforced Aluminum Composite. 1783-1785A
Some Observations on the High-Temperature Creep Behavior of 6061 Al—SiC Composites. 2089-2090A

White metal (copper matte)
See Copper mattes

Widmanstatten structure
Bainite in Steels. 767-797A
A Perspective on the Morphology of Bainite. 817-829A
Influence of Carbon Concentration and Reaction Temperature Upon Bainite Morphology in Fe—C—2Mn Alloys. 1391-1411A
Continuous Cooling Transformations and Microstructures in a Low-Carbon, High-Strength Low-Alloy Plate Steel. 1493-1507A
An Investigation of the High-Temperature and Solidification Microstructures of PH 13-8 Molybdenum Stainless steel. 2465-2475A

Wire, Powder technology
The Process of Bubble Formation in the Hot Isostatic Pressing Treated, Doped Molybdenum Wire. 919-923A

Wolfram
See Tungsten

Work hardening
See Strain hardening

Work softening
See Strain softening

Work strengthening
See Strain hardening

Workability
See Formability

Wustite, Reduction (chemical)
Reduction of Solid Wustite in $H_2/H_2O/CO/CO_2$ Gas Mixtures. 135-139B

X ray analysis
See X ray diffraction

X ray diffraction
See also X ray powder diffraction
X ray stress analysis
Development and Relaxation of Stress in Surface Layers; Composition and Residual Stress Profiles in γ'-Fe_4N_{1-x} Layers on α-Iron Substrates. 189-204A
An X-Ray Diffraction Line Profile Analysis in Cold-Worked FCC Cu—1Zn—Sn and Ag—1Zn—Sn Alloys: Role of 1 wt.% Zn. 1319-1322A

X ray diffractometer
See X ray diffraction

X ray powder analysis
See X ray powder diffraction

X ray powder diffraction
An X-Ray Diffraction Line Profile Analysis in Cold-Worked FCC Ag—1Sn—Zn Alloys: Role of 1 wt.% Sn. 1327-1330A

X ray powder photography
See X ray powder diffraction

X ray stress analysis
Determination of Residual Stresses in Thin Sheet Titanium Aluminide Composites. 2701-2707A

Yield
Acoustic Emission During Deformation of Dual-Phase Steels. 373-379A

Yield strain
See Strain

Yield strength
High-Temperature Deformation Mechanisms and Constitutive Equations for the Oxide Dispersion-Strengthened Superalloy MA 956. 353-364A
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. II. Finite-Element Analysis. 411-420A
Bauschinger Effect and Residual Phase Stresses in Two Ductile-Phase Steels. II. The Effect of Microstructure and Mechanical Properties of the Constituent Phases on Bauschinger Effect and Residual Phase Stresses. 725-732A
The Composition and Temperature Dependence of the Mechanical Properties of Tungsten Alloys. 744-748A
The Effect of Matrix Reinforcement Reaction on Fracture in Ti—6Al—4V-Base Composites. 1579-1587A
Effect of Threshold Stress Intensity on Fracture Mode Transitions for Hydrogen-Assisted Cracking in AISI 4340 Steel. 2577-2583A
Tensile and Impact Properties of Directionally Solidified Fe—40Al Intermetallic. 3027-3028A
Large-Strain Bauschinger Effects in FCC Metals and Alloys. 3201-3213A

Yield strength, Deformation effects
Laboratory Simulation of Seamless Tube Piercing and Rolling Using Dynamic Recrystallization Schedules. 153-164A
Experimental Assessment of Structure and Property Predictions During Hot Working. 3101-3114A

Yield strength, Microstructural effects
Tensile Properties of Short Fiber-Reinforced SiC/Al Composites. I. Effects of Matrix Precipitates. 401-410A
Estimation of the Yield Strength of Metals From Crystal Defect Energies. 1719-1723A

New Aspects on the Superplasticity of Fine-Grained 7475 Aluminum Alloys. 2729-2737A
Composite Ferrous Powder Metallurgy Structures: Mechanical Properties and Stress Analysis. 2943-2955A

Yield stress
See Yield strength

Youngs modulus
See Modulus of elasticity

Yttrium, Corrosion
Corrosion of Mo, Nb, Cr and Y in Molten Aluminum. 2919-2928A

Yttrium compounds, Mechanical properties
Mechanical Properties of Alloys of IrNb and Other High-Temperature Intermetallic Compounds. 3063-3074A

Zinc, Casting
On the Heat Transfer to the Wheel in Planar-Flow Melt Spinning. 279-283B

Zinc, Diffusion
Bicrystal Studies of Diffusion-Induced Grain Boundary Migration in Cu/Zn. 2363-2367A

Zinc, Extraction
Study of Moisture Transfer During the Strand Sintering Process. 37-47B
Fundamental Studies on Chlorine Behavior as Related to Zinc Electrowinning From Aqueous Chloride Electrolytes. 251-258B
Oxidative Ammonia Leaching of Pure Zinc Sulfide in the Presence of Lead Compounds. 402-404B
Competitive Solvation and Complexation of Cu(I), Cu(II), Pb(II), Zn(II), and Ag(I) in Aqueous Ethanol, Acetonitrile, and Dimethylsulfoxide Solutions Containing Chloride Ion With Applications to Hydrometallurgy. 439-448B
Oxidative Leaching of an Offgrade/Complex Copper Concentrate in Chloride Lixiviants. 611-620B
Mathematical Models of Current Losses in Bipolar Cells. 783-790B
Kinetics of the Dissolution of Zinc Sulfide in an Oxidizing Slag. 867-872B
The Reduction of Zinc From Slags by an Iron—Carbon Melt. 885-897B
The Use of Rotating Electrodes in the Electrolysis of Molten Zinc Chloride Electrolytes. 977-985B

Zinc, Mechanical properties
Estimation of the Yield Strength of Metals From Crystal Defect Energies. 1719-1723A

Zinc, Solubility
Modeling of Collision and Coalescence of Droplets During Microgravity Processing of Zn—Bi Immiscible Alloys. 59-68A

Zinc base alloys, Mechanical properties
Interface Sliding, Migration, and Cracking During Fatigue Deformation of a Superplastic Aluminum—Zinc Eutectoid Alloy. 2497-2504A
Effect of Impurity Content on Cavitation in the Superplastic Zn—22Al Alloy. 2605-2608A

Zinc base alloys, Metallography
A Mössbauer Study of Zinc—Iron Intermediate Phases and Electrodeposited Coatings. 273-277A

Zinc base alloys, Microstructure
The Effect of Fatigue Deformation on Microstructural Evolution in a Superplastic Aluminum—Zinc Eutectoid Alloy. 2505-2511A

Zinc plating
The Effects of Lead on the Electrochemical and Adhesion Behavior of Zinc Electrodeposits. 81-86B

Zircon, Composite materials
Energetics of Particle Transfer From Gas to Liquid During Solidification Processing of Composites. 2073-2082A

Zirconium, Alloying elements
Effects on Microstructure and Tensile Properties of a Zirconium Addition to a Cu—Al—Ni Shape Memory Alloy. 741-744A

Zirconium, Powder technology
Nanocrystalline Metals Prepared by High-Energy Ball Milling. 2333-2337A

Zirconium base alloys, Corrosion
Effects of Crack Tip Stress States and Hydride-Matrix Interaction Stresses on Delayed Hydride Cracking. 2905-2917A

Zirconium base alloys, Irradiation
Radiation Effects on Time-Dependent Deformation: Creep and Growth. 1053-1063A
Residual Grain-Interaction Stresses in Zirconium Alloys. 1083-1095A
Irradiation as a Tool for Studying Solid-State Amorphization Phenomena. 1809-1815A

Zirconium compounds, Irradiation
Amorphization in Zr_3Al Irradiated With 1 MeV e^- and Kr^+. 1799-1808A

Zirconium compounds, Phases (state of matter)
Solid-State Diffusion Reaction and Formation of Intermetallic Compounds in the Nickel-Zirconium System. 2897-2903A

Zone melting
Dendrite Arm Climb by Temperature Gradient Zone Melting During Solidification of a High-Speed Tool Steel. 264-266A
Purification of Tin by Zone Refining With Development of a New Model. 455-461B

Zone refining
See Zone melting
